iXWATER™

ECO-FRIENDLY WATER FILTER

A truly eco-friendly cartridge water filter - made in Britain

The iX Filter is the first truly eco-friendly cartridge filter made in Britain, offering Insert Refill Technology to provide a genuinely sustainable and cost effective alternative to mainstream cartridge filters already in the marketplace. For use on coffee machines, water coolers, ice machines, vending machines and catering applications, the iX range offers a comprehensive product in a cost effective, efficient, flexible and stylish package.

SAVE UP TO 50% OFF YOUR FILTER COSTS
With our insert refill technology.

You can decide whether to quick change by easily fitting a replacement cartridge - or to maximise cost saving and reducing environmental impact by changing the insert by using the special tool provided.

The iX Filter offers a new and ideal opportunity to bring down filtration costs whilst reducing your carbon footprint at the same time.

Quality assurance

ISO 9001, 14001 & 18001 accreditations prove our quality and our commitment to customer service & the environment. Our iX products are NSF approved and iX media is WRAS approved.

Quick change, auto shut-off head with 20% bypass for optimum filtration performance

Replace refill insert for extra savings and environmental benefits

Other makes of In-line water filters cannot be recycled and go straight to landfill.

With iX's revolutionary **Insert Refill Technology** you save £££ every time you replace the filter insert. You also help to reduce waste and help protect the environment.

Replace.

Return.

Recycle.

Reduce.

Take full advantage by using our NEW Replace, Return & Recycle Kit

Your business takes its environmental responsibilities seriously and we are passionately committed in playing our part to help you achieve your goals.

We know that replacing water filters can be expensive and time consuming and that disposing of expired cartridges can be a necessary, but unwanted, hassle. We are acutely aware of the negative impact that waste plastic has on the environment.

So, we've created a product and program designed to not only reduce your costs significantly, but also recycle 100% of the expired media inserts and return these back into the market place – keeping costs & waste down, whilst creating measurable control.

Our Media Insert Technology allows us to recycle all the plastics returned to us. In addition, we regenerate the resin (media) inside our refills and re-use it in our replacements. This allows us to keep your costs to a minimum whilst providing an ethical service, sensitive to our planet's delicate eco-system.

When you order a new iX Filter or a replacement Media Insert Refill, you'll receive a free recycling kit consisting of a pre-paid envelope, and a sealable, watertight bag. This makes returning your expired cartridges to us as simple as possible and will no doubt comply with your own environmental policies.

We are passionate about providing cost effective, eco-friendly solutions to water treatment. Our NEW, bigger iX range of water filters, along with our Replace & Return Program provide an easy, responsible and cost effective alternative to current one way systems.

& Save £££s

Pence per litre our iX Filter is over 60% more cost effective when you replace the media insert compared to exchanging a traditional one-way water filter. Its therefore not just much kinder to the environment but is also much better value.

**60%
MORE
COST
EFFECTIVE**

Enjoy even more efficiency with the iX compatible DIGI-FLOW water meter.

Ensure your filters are changed at the right intervals with a digital flow meter from Watercare.

iX FILTER

For great hot beverages

Improve the quality and taste of your coffee and hot beverages whilst being more ECO friendly. The iX FILTER 01, 02 and 03 (Ion Exchange), save you money and keep you green.

- NSF Certified components & certified media
- Simple installation
- Quarter turn release mechanism shuts off water supply for easy maintenance
- Filter housing is reusable and filters are easy and economical to replace
- No waste - replace & return the insert refill
- Suitable for coffee and food service applications

Specially formulated media insert to reduce scale AND provide superior taste, aroma and crema for outstanding results.

Application: Small table top machines, low volume usage.

iX FILTER

iX CARBON

Improve taste, colour and odour of drinking water

For fresh, great tasting water, choose iX CARBON. Specifically designed for taste, colour and odour improvement.

With 4 stage filtration the iX CARBON water filter is specifically designed to deliver fresh, great tasting water for coffee, tea* or drinking water.

The iX CARBON provides the perfect filtration product for soft water regions, where scale is not an issue, by filtering the water to produce a clear, improvement in the quality of taste, colour and odour.

iX CARBON's silver impregnated Granular Activated Carbon (GAC) combined with a final, additional carbon block further improves quality of water.

*in areas where water is soft and limescale does not form.

iX CARBON - Peace-of-mind

The iX CARBON's GAC provides the perfect platform in preparation for your hot beverages.

As well as providing a constant reduction of water borne substances that will effect taste and aroma, such as chlorine, the iX CARBON reduces organic impurities and improves the taste and odour of your water.

Designed exclusively for potable water to provide a consistently high quality for optimised water preparation.

Application: drinking water taps, medium use water coolers, coffee* and tea*.

iX CARBON

iX VEND

Water filter for vending machines

The iX VEND has a 5-stage filtration process designed to provide high quality water, improving taste, colour and odour whilst inhibiting scale for high volume hot beverage and vending applications.

The filter reduces sediment and chlorine whilst protecting against bacteria and water borne cysts.

iX VEND's in-built scale inhibition dramatically reduces scale build up and saves energy.

The simple installation and quick replacement makes the iX VEND the ideal choice for caterers and vending operators requiring high volume, safe water treatment whilst making considerable cost savings.

Massive Savings to be made

By replacing the iX Insert rather than the whole cartridge you can make huge savings every year. For example - If you have a machine park of 100, you are likely to save £11K per year versus competitor brands.

The ideal water filter choice for vending equipment and coffee dispensers.

iX VEND

iX ICE

For ice machines, cubers and flakers

A refreshing cold drink isn't complete without ice.

Freezing water to make ice causes the dissolved minerals in hard water to precipitate and coat the working surfaces. This leads to increased energy costs and poor quality ice. It will also lead to a reduction in ice production and will eventually cause equipment breakdown.

Make sure your ice cubes are bright and clear and protect your equipment from the potential damage of limescale.

iX ICE offers a new and ideal opportunity to bring down filtration costs whilst reducing your carbon footprint at the same time. Our iX ICE works with all major brands of flakers and cubers and comes with options for connections.

5-Stage filtration system improves taste and inhibits scale build up in your machine.

Application: small ice cubers, dispensers producing 40/50Kg (24 Hrs).

Order Codes:
IX01ICECOMPLETE
IX01ICECARTRIDGE
IX01ICEREFILL

01

Application: medium cubers producing 80/100 Kg (24 Hrs).

IX03DISPENSEREFILL

03

Quick replace cartridge or to be totally cost-effective and green - replace insert only.

iX DISPENSE

For ice machines and post mix systems

Highly profitable and high in water content (over 80% water), the quality of water used for cold beverage dispense machines is vitally important. Fast moving restaurants and stores depend on high quality water to provide an uninterrupted and smooth operation. Also, in order to achieve high levels of customer satisfaction and retention, the quality of water needs to be of the highest standard.

The iX DISPENSE 03 has been specifically designed to provide better tasting drinks, whilst keeping costs as low as possible. The iX 03's Insert Refill Technology also provides confidence that your environmental impact is lowered further.

SPECS	ICE 01	ICE 02	DISPENSE 03
HEIGHT WITH HEAD	350mm	535mm	620mm

iX ICE/DISPENSE

iX VAPOUR

For steam ovens

Our new iX VAPOUR 03 has been specially designed for use with steam ovens and other catering equipment that uses steam.

Combi Ovens, Pasta Cookers, Bratt Pans or Boilers will suffer from a build-up of lime scale which will attack elements, oven chambers and sensors and will lead to expensive break-downs and unwanted kitchen down-time.

The iX VAPOUR 03 will protect your steam oven from the harmful effects of scale thanks to the ion-exchange media housed within the Insert Refill.

Unlike traditional cartridge filters, the iX VAPOUR 03 Insert Refill Technology means that only the refill needs replacing, reducing costs and minimising unnecessary waste of plastic to landfill which clearly harms the environment.

SPECS	VAPOUR 03
HEIGHT WITH HEAD	620mm
HEIGHT CARTRIDGE	600mm
HEIGHT HEAD	220mm
CAPACITY @ 180PPM	5757 ltrs
FLOW RATE MAX (L/PM)	15
PRESSURE	2-6 bar
MAX TEMP °C	35 °C
CONNECTION P/F	3/8"

Essential for the protection and longevity of commercial steam ovens, pasta cookers and boilers.

Visit us at watercare.co.uk on PC, laptop, tablet & mobile.

Application: Small combi ovens, medium use Pasta cookers and boilers.

Order Codes:

iX VAPOUR

iX KONEKT

Specialist water filters

iX KONEKT offers all the versatility and flexibility of its larger siblings but in a smaller and more compact format where space is a premium. Using Refill Insert technology, iX KONEKT filters still offer benefits to both the environment and your pocket but do so in a range of specialist media's that offer targeted solutions to your water borne problems.

iX KONEKT Filters are used on;

- Water Boilers
- Drinking Water Dispensers
- Water Coolers
- Pre-Filter Scenarios
- Vending Machines

Offering;

- Scale inhibition
- Improved taste
- Bacteria removal
- Sediment removal

POLYPHOSPHATE

For hot water boilers and small hot beverage machines

Water Filter with Refill Insert Technology. For use with hot water boilers & small hot beverages machines. Food grade Phosphates contained in this filter inhibit build-up of scale by stabilising water. Addition of carbon block helps improve the quality of taste, colour & odour of water. Cold water use only.

CODE: IXKONEKT-PHOS RE-ORDER: IXK-PHOS-REFILL

CARBON CT-01

Improves taste, colour and odour of drinking water

Water Filter with Refill Insert Technology. For use with drinking water, water coolers & in soft water areas. 1Micron Carbon Block Filter. Improves taste, colour & odour of drinking water. Carbon Block offers superior surface area to granular carbon whilst minimising pressure drop. Reduces organic impurities and chlorine. Cold water use only.

CODE: IXKONEKT-CT01 RE-ORDER: IXK-CT01-REFILL

HPC

Lead, bacteria, chlorine, pesticide, herbicide removal

Water Filter with Refill Insert Technology. High spec, high capacity 0.5 Micron Filter Block. Used to remove lead and bacteria such as cysts. Also removes chlorine, herbicides and pesticides for great tasting drinking water. Cold water use only.

CODE: IXKONEKT-HPC RE-ORDER: IXK-HPC-REFILL

SEDIMENT

For the reduction of particulates from water

Water Filter with Refill Insert technology. For use in reducing particulate, organic matter from water. 5 Micron, ceramic sediment filter acts as a superior pre-filter, preparing water for further treatment such as removal of chemicals & heavy metals. Sediment filter does not improve taste, colour or odour of water.

CODE: IXKONEKT-SEDI RE-ORDER: IXK-SEDI-REFILL
